

**“DANCE IS THE
HIDDEN LANGUAGE OF
THE SOUL”**

Associates in Cultural Exchange is a non profit organization 501(c)3 founded in Seattle in 1973 that aims to expose elementary students to varied cultures worldwide.

A.C.E’s school based cultural programs continues the tradition of quality programming by partnering with schools, parents, teachers and community organizations to develop and implement curricula that are appropriate for young students.

Our dance lessons will be conducted by highly trained and experienced instructors that will bring as much fun as learning for each and every child.

Elementary Students learning native History while Dancing

WHY MUSIC AND DANCE?

"MUSIC OPENS THE DOOR TO YOUR SOUL."

- **What do your kids do after school?** Instead of hiring someone to watch your child or letting your kids play video games while sitting in front of the computer/television, why not enroll them in something much more fun, exciting, and educational?
- **We offer music and dance lessons for 6-14 year-old children** once or twice a week after school right on the school grounds. This program consists of a variety of international music such as but not limited to: Chinese, African, and Russian, as well as many traditional dance lessons from different cultures around the world.
- Through the **exposure to music of different cultures**, your kids will naturally learn about other cultures and will explore different sounds and rhythms. Dancing is a fun, enjoyable way for children to *develop their physical skills and stimulate their imagination and creativity.*

- As the society develops, many physical and interactive activities for children have been limited and replaced by high tech products such as computers and video games. This is a great **opportunity for your kids to get exposed to different cultures through fun activities.**

MANY RECENT STUDIES HAVE SUGGESTED THAT:

- The process of singing *stimulates new learning and memory.*
- Most 6-15-year-old children with music training had significantly better verbal memory than children without such training, especially those who had received music training before they reached the age of 12. **The longer the training, the better the verbal memory.**
- Children provided with music instruction score higher than others on spatial-temporal tasks, **reading and mathematical abilities.**

- The children with music lessons had **better memories** as well as **higher literacy and math levels.**
- When children sing and dance to the music, their **developing brains** are entirely engaged and stimulated.

"Every day brings a chance for you to draw in a breath, kick off your shoes, and dance."

- Oprah Winfrey
